

PLEXOS NERVIOSOS

Carlos Alberto Castaño Quintero

**Pasantía en docencia y monitoría en área
de neurología y neurorehabilitación**

Docente: Carolina Salazar Marquez

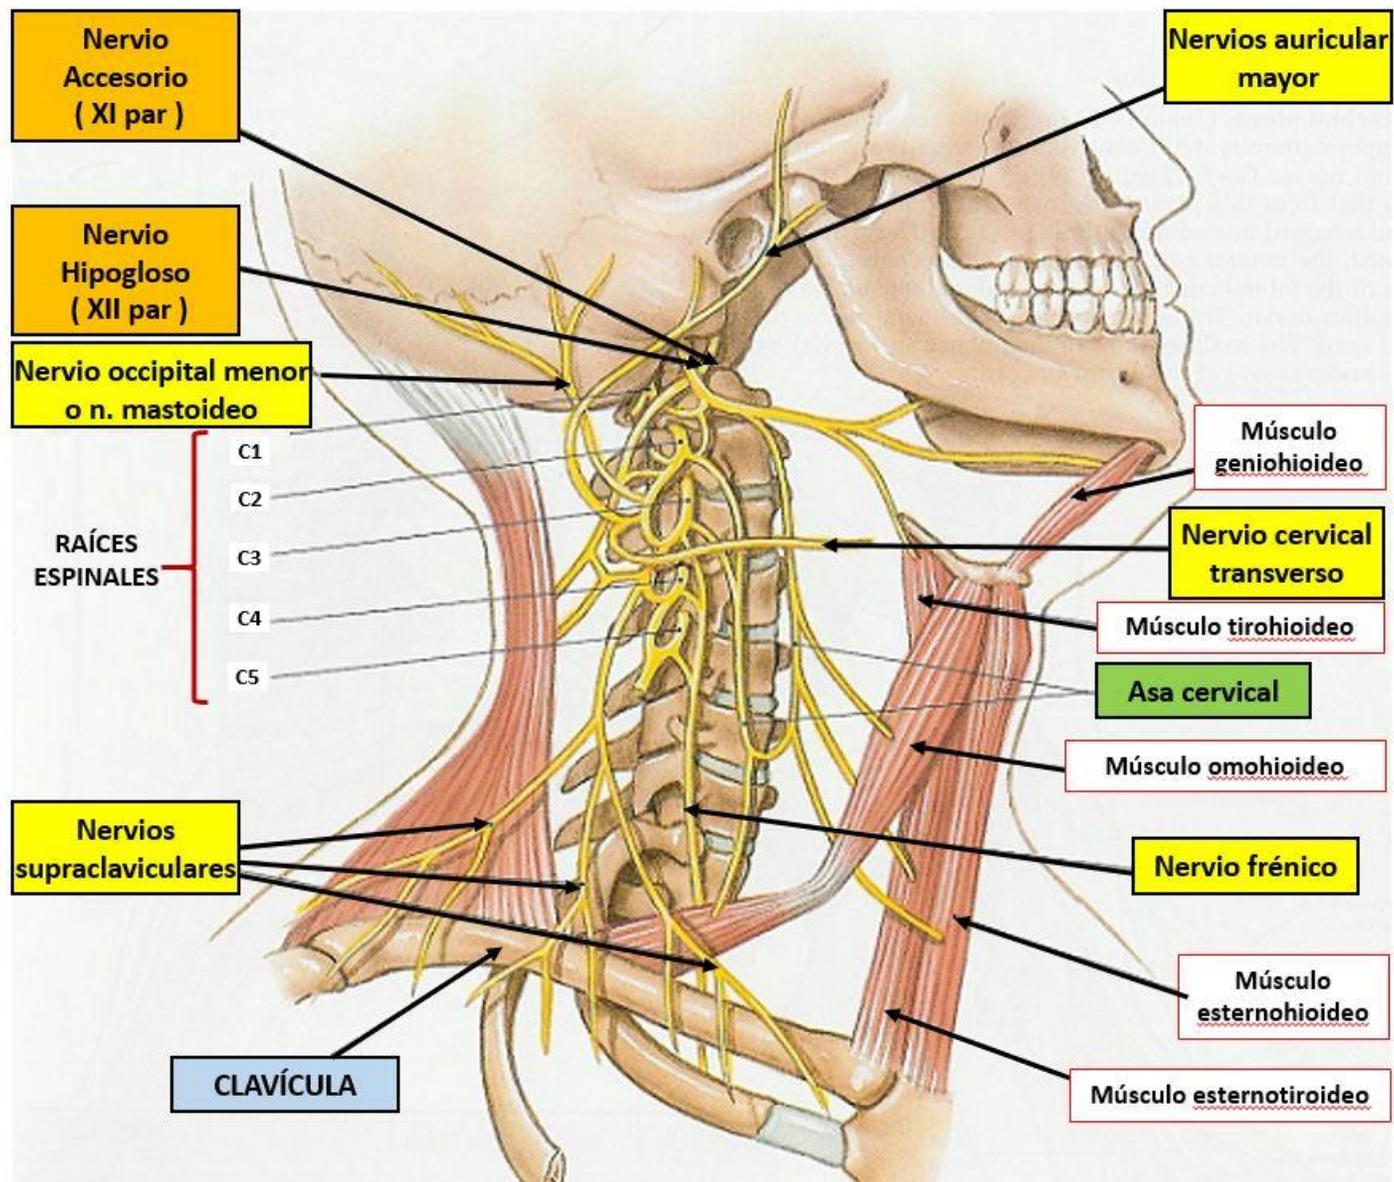

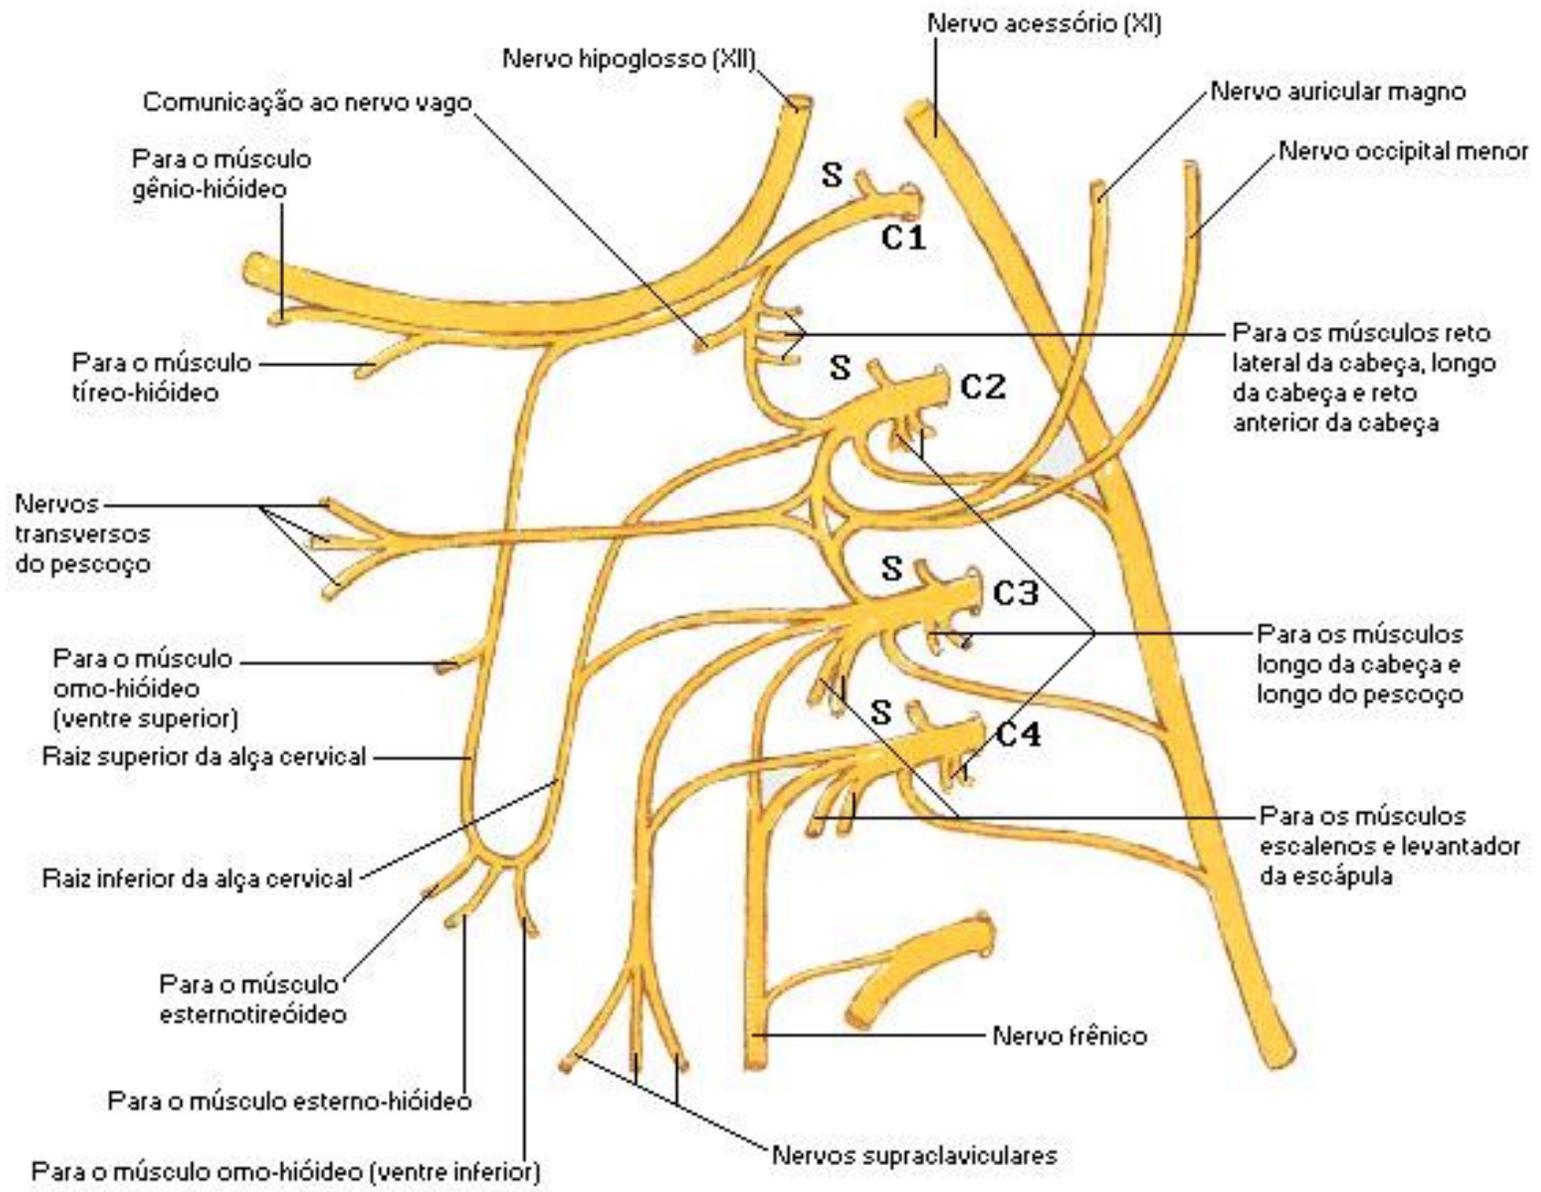

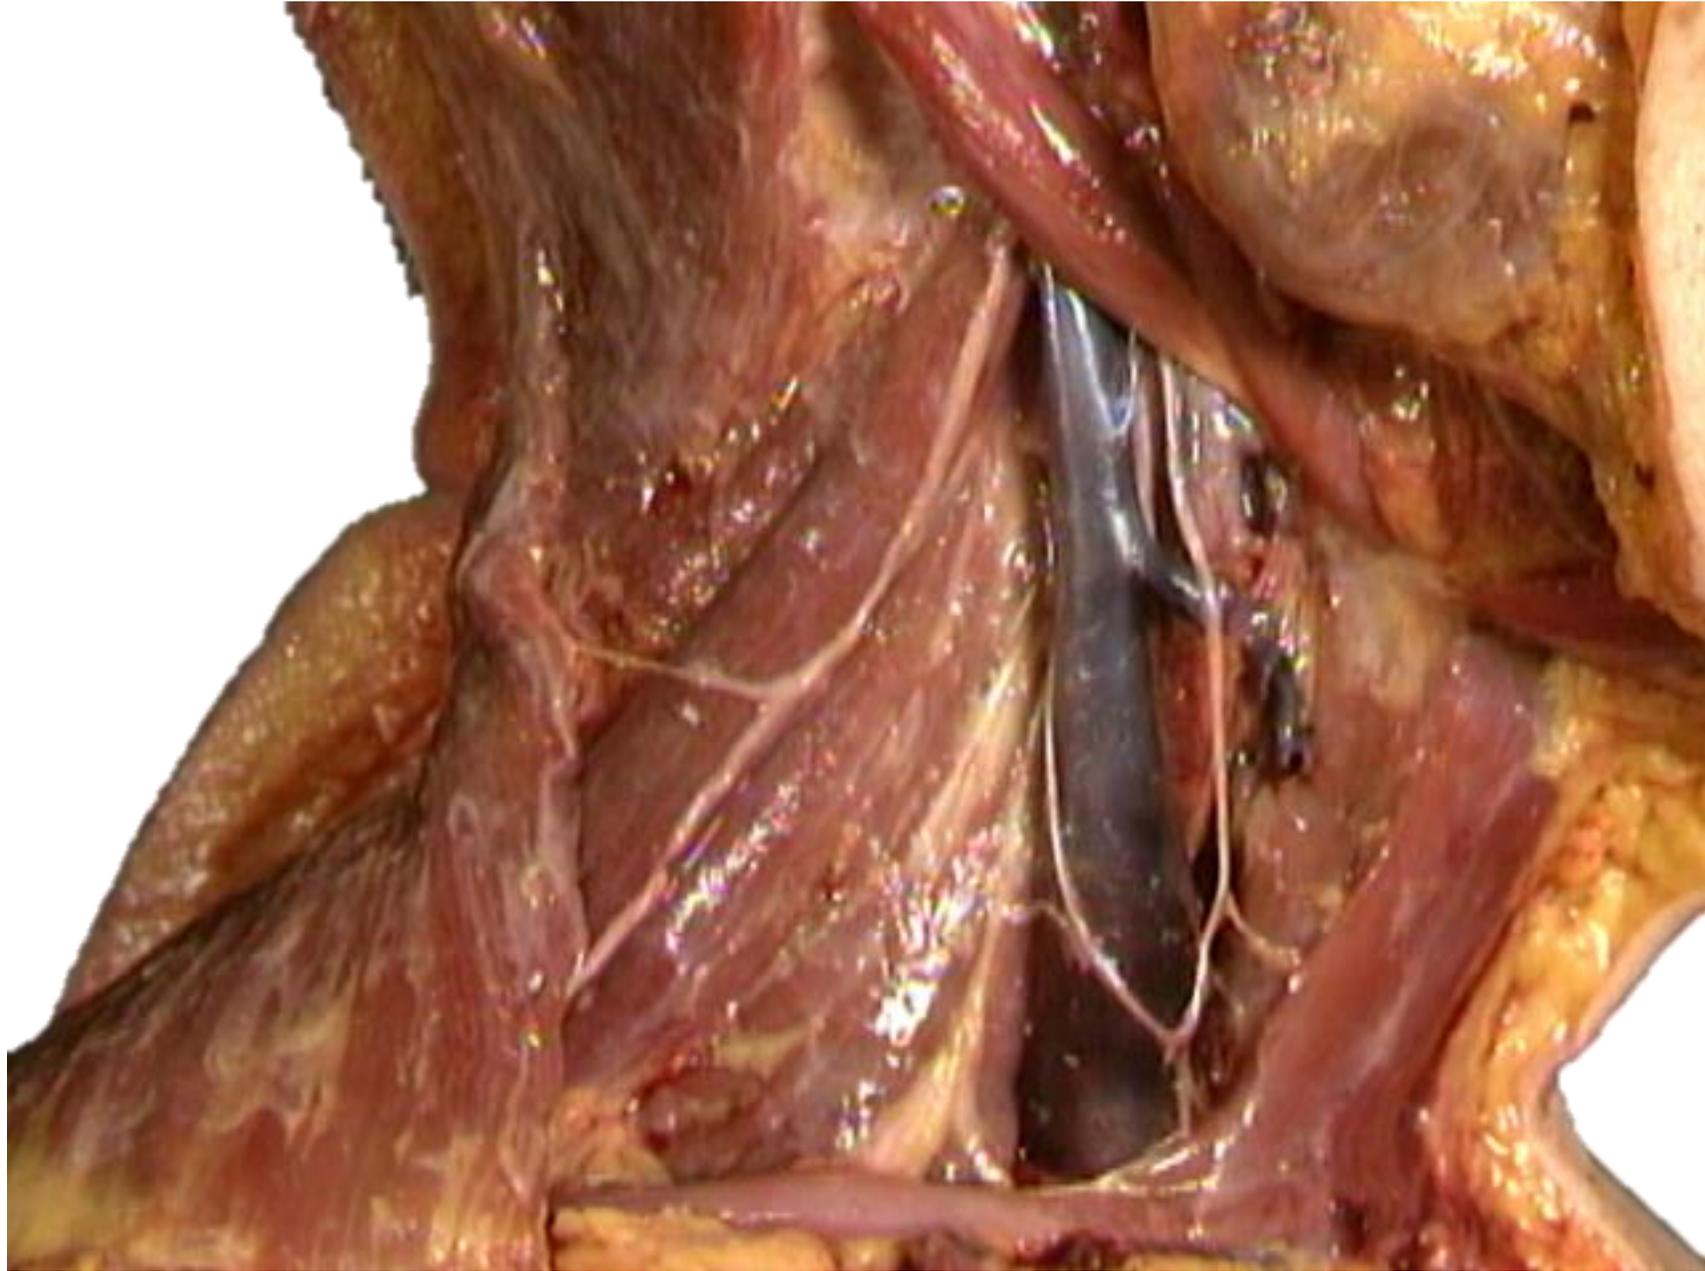

Del latín plexus, significa red entrecruzada. Hace alusión a una red nerviosa, sanguínea o linfática.

En el cuerpo humano existen tres plexos: **cervical, braquial y lumbosacro**

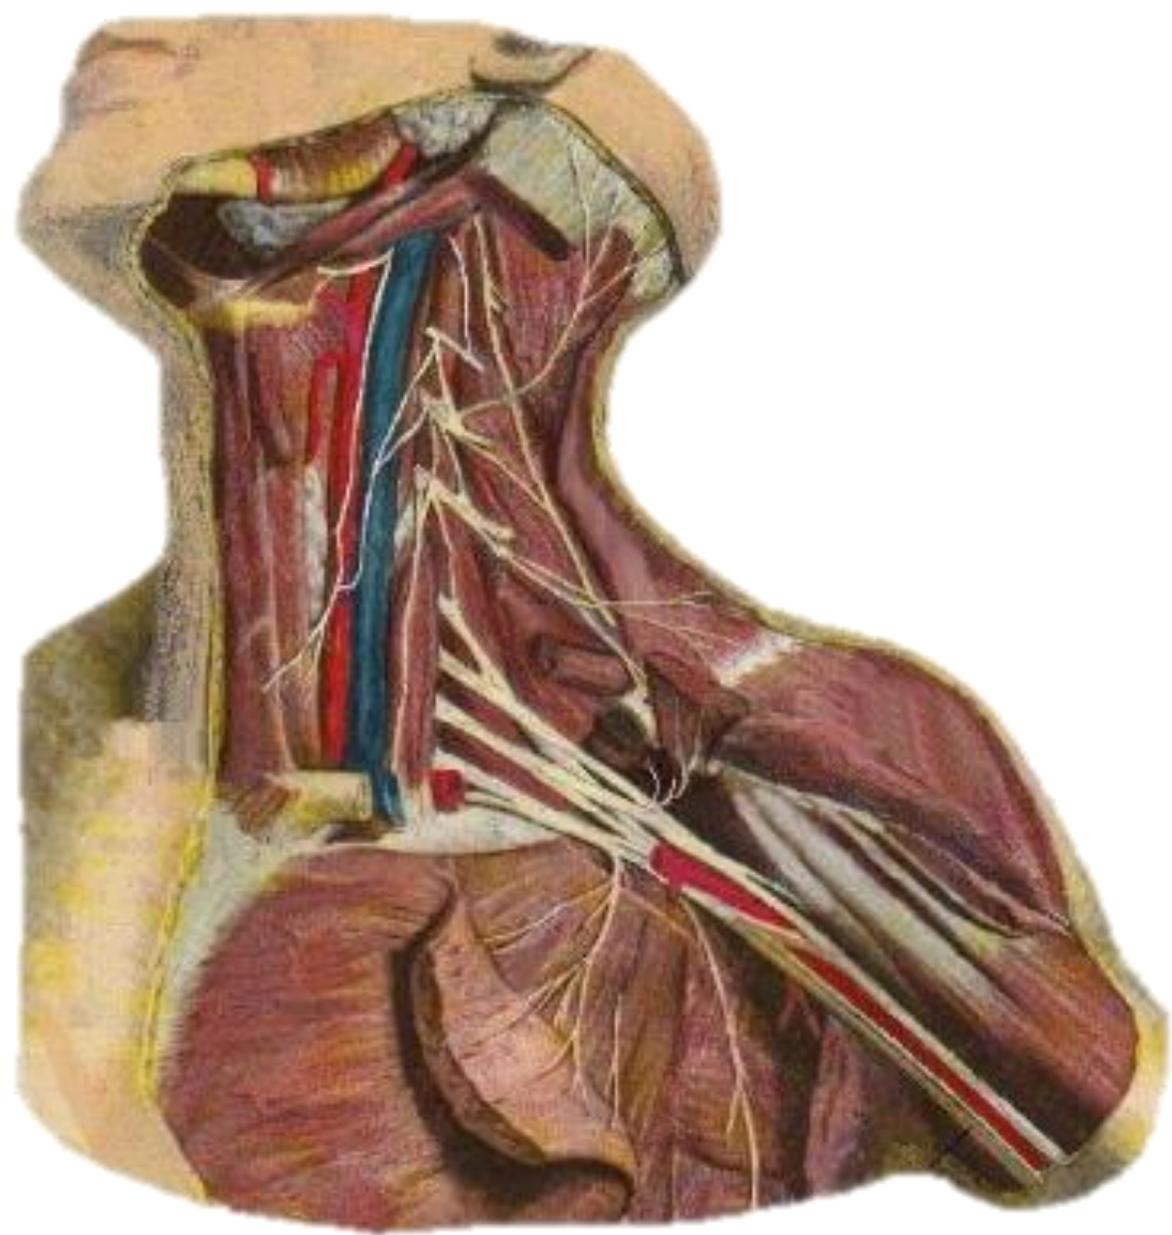

PLEXO CERVICAL
